Original size

#### Metal detectable

While working, a cutting tool – or parts of it – can sometimes get lost. But only for a short while. The metal detectable plastic and distinctive blue colour ensures you'll find it again fast.

#### Paint-free

You would like to avoid risks in your job, wherever possible? That's understandable. An unpainted handle minimises the risk of contamination of the production process.

#### Robust handle

The plastic insert of the SECUNORM PROFI40 MDP is in an aluminium handle. With its robust design, it is predestined for high cutting frequencies and a long life.

#### Very large cutting depth

The extra large cutting depth is ideal for multi-ply cardboard and bagged goods, and, for example, to cut any type of film. The stainless quality blade is characterised by an extremely low risk of breakage.

#### Tool-less blade change

Blade changing is quick to work out. Literally. You just need to slide the metal detectable plastic insert out of the handle and replace the old blade with a new one.

## Deep cut. High quality. Metal detectable.

Just like the other PROFIs, the SECUNORM PROFI40 MDP is a professional cutting tool. Particularly when it comes to cutting open all different types of sacks. Some cutting tasks demand a decent blade length. The 40 mm blade extension of the robust SECUNORM PROFI40 MDP therefore makes it an excellent choice. It is also paint-free and metal detectable, ideal for industries wanting to avoid foreign objects entering and disrupting their production processes.

### Application

### Safety technology

#### Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM PROFI40 MDP guarantees a high degree of safety from cut injuries. As soon as you have started to cut, take your thumb off the slider. Then the blade will retract into the handle immediately after leaving the material being cut.

# THE PERFECT FIT FOR ALL. DOES THE PERFECT JOB.
