

## SECUNORM MULTISAFE

A ROBUST, SOLID AND EASY TO USE MULTI-TASKER.

THE SAFER WAY TO CUT.

**martor**

# SECUNORM MULTISAFE

## NO. 8152

Original size

### Robust design

As you can see and feel, the SECUNORM MULTISAFE is extremely stable. And flexible, since you can use a large number of blade shapes. The product is therefore suitable for many cutting applications.

### Made of solid metal

The SECUNORM MULTISAFE is a tool that seems to be made of one casting. Zinc die casting, to be precise. For certain industries, e.g. the food industry, the product is also available unpainted.

### Slide on top

With the right or with the left hand, you ask? Left and right, is the answer! The metal slider is on top of the handle. And can thus be easily used with either thumb.

### 2-cutting edge blade

Before you have to change the quality blade, you can turn it over once. This doubles the usage time of the blade - and reduces your energy consumption. Because your SECUNORM MULTISAFE will cut again like new.

### Eyelet for fastening

Ever since its introduction the SECUNORM MULTISAFE is equipped with an eyelet for tethering your knife to you or a work station.

## Simply Heavy Metal.

The SECUNORM MULTISAFE is a real classic that is now available in a brand-new design. It provides excellent durability thanks to its handle made of zinc and its uncomplicated, robust design. With its notable blade extension, you can cut all standard materials. Should you have any particular requirements, you can re-fit the SECUNORM MULTISAFE with one of our many optional blades.

### Application

### Certificates and awards

### Safety technology

#### Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM MULTISAFE guarantees a very high degree of safety from cut injuries. As soon as you have started to cut, take your thumb off the slider. The blade will withdraw back into the handle immediately after leaving the material being cut.

YOU CAN FEEL THE QUALITY.
