SECUPRO 425

NO. 425095

Original size

Outstanding ergonomics
The SECUPRO 425 could become your new favourite tool. The handle and lever are designed to reduce hand strain, regardless of hand size and duration of use. You can then quickly complete your tasks without tiring.

Sustainable and long-lasting
The handle housing is made from 60% recycled plastic and reinforced with glass fibre. This allows the SECUPRO 425 to combine lightness with robustness and versatility, the basis for high performance cutting in day-to-day work.

Appropriate cutting depth
Even with a cutting depth of „only“ 15 mm, all common packaging can be opened – without getting too close to the contents. The rounded blade tip also helps to protect the goods.

2-cutting edge blade
Before replacing the high-quality blade, it can be turned. This doubles the blade's service life and reduces the effort required. Your product will then cut like new again.

End-to-end safety
At the front, you can rely on blade retraction, while at the rear there is a safety lock. This allows you to lock the lever and prevent unintentional release of the blade.

A lightweight with outstanding performance.
 Do you want to work quickly and safely? The lightweight SECUPRO 425 is designed to deliver exactly that. The safety knife fits perfectly in your hand, helping you work efficiently. With the squeeze-grip made from recycled plastic (at least 60%), you can effortlessly cut a wide variety of materials, e.g., up to 2-ply corrugated cardboard and plastic strapping. You can also relax thanks to the fully automatic blade retraction. It reliably protects you from cutting injuries.

PRODUCT FEATURES

Technical features

-  Very high safety
-  Tool-less blade change
-  Abrasion resistant
-  Very ergonomic
-  Safety lock
-  2-cutting edge blade
-  Cutting depth

-  **NO. 160099** 0.63 mm, rounded blade tips, deep-edged, stainless

Certificates and awards

Application

Safety technology

Fully automatic blade retraction – a very high degree of safety

The fully automatic blade retraction of the SECUPRO 425 guarantees a very high degree of safety from cut injuries. The blade withdraws into the handle immediately after leaving the material being cut. Even when the lever is still being squeezed.

THE PERFECT FIT FOR ALL. DOES THE PERFECT JOB.

SECUPRO 425

- › Squeeze-grip knife with large cutting depth
- › Fully automatic blade retraction
- › Lightweight handle made of recycled plastic
- › For frequent cutting
- › GS-certified for approved safety
