

SECUNORM HANDYCUT

PLAIN AND SIMPLE: A DEPENDABLE TOOL.

THE SAFER WAY TO CUT.

martor

SECUNORM HANDYCUT
NO. 446

Original size

4-cutting edge blade

Why do you benefit more from your blade? Because it has four sharp cutting edges. By turning and turning it over, you quadruple the usage time - and always cut again like new.

Slider on both sides

With the right hand? With the left hand? It's all the same here. Because we have fitted the SECUNORM HANDYCUT with a slider that is accessible from both sides. So, anyone can really work with it!

Handy format

The SECUNORM HANDYCUT fits into every pocket. In case you don't need it at a specific time. You will enjoy its light weight and handiness when cutting. And the good grasp on the corrugated slider.

Without tools

Changing blades is so easy. You do not need a tool. Pull the plastic insert out of the handle at the back, turn or change the blade, put everything back and there you have it!

Practical, rectangular, good.

The SECUNORM HANDYCUT can do whatever the SECUNORM HANDY can. The only difference is the plastic handle. This reduces its life, but also its price. Otherwise, it is no less efficient than its more robust brother: You can use the blade 4 times, which is very economical. You can cut almost all materials. And you can go at a high speed without getting tired. Because it is so light and handy.

PRODUCT FEATURES

Technical features

	High safety		Tool-less blade change

--	---------------	---------

Optional blade

	NO. 145	0.30 mm, stainless
--	----------------	--------------------

Certificates and awards

Application

Safety technology

Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM HANDYCUT guarantees a very high degree of safety from cut injuries. As soon as you've started the cut remove your thumb from the slider. The blade will then withdraw back into the handle immediately after leaving the material being cut.

YOU CAN FEEL THE QUALITY.

SECUNORM HANDYCUT
