

SECUNORM MULTISSET

FINALLY SOMEONE WHO FULLY ADAPTS TO YOU.

THE SAFER WAY TO CUT.

martor

SECUNORM MULTISSET

NO. 118001

Original size

Flexible cutting depth

What does the SECUNORM MULTISSET have that other cutters don't? A locking screw with which you can adjust blade extension infinitely up to 25 mm, that's what! In other words, the SECUNORM MULTISSET can be easily adapted to perfectly meet individual needs.

Abrasion resistant

The plastic insert of the SECUNORM MULTISSET slots into a fully aluminium body. With its robust body and replaceable insert, this cutter can cope with high cutting frequencies over an extended period of time.

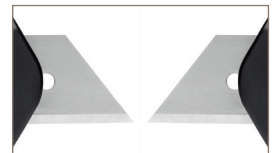

Double-sided blade

Before you need to change the quality blade, you have the chance to turn it over once. Usage time of the blade is doubled and fatigue is held at bay: with a simple flip of the blade, your SECUNORM MULTISSET will cut like new again.

Tool-less blade change

Ready, set, blade change! Changing the SECUNORM MULTISSET blade is quickly done. Simply push the plastic insert out of the handle and either rotate or replace the blade.

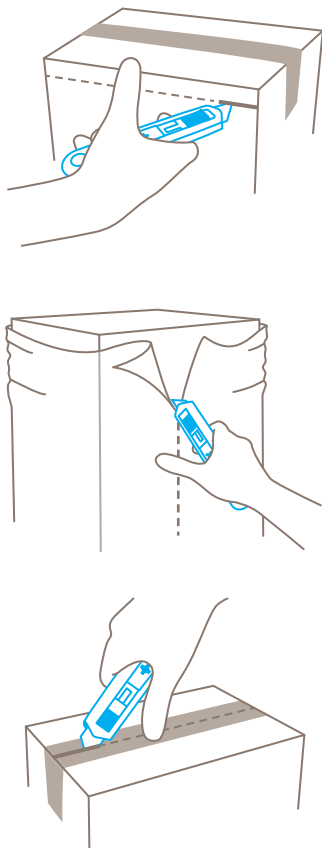

For right and left handers

The SECUNORM MULTISSET is the right size for every hand. Yours too. If you are a left hander, simply turn the blade 180° and your cutting tool is ready to use.

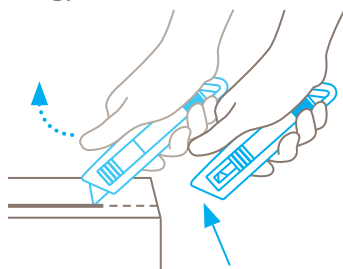

Many cutting tools in one.

The SECUNORM MULTiset is a respected member of our legendary PROFI family. It adopted the name „MULTiset“ due to of its unique property: a multi-‘set-able’ blade length. Ultimately, it’s up to you to decide how long the blade should extend: 5, 9, 14, 19, 25 mm, the options are multiple. Depending on your needs, you can adjust the blade length. Your needs change? SECUNORM MULTiset can change with you!

Application

Safety technology

Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM MULTiset guarantees a very high degree of safety from cut injuries. As soon as you have started to cut, take your thumb off the slider. In this way, the blade can automatically withdraw into the handle, the moment it loses contact with the material being cut.

PRODUCT FEATURES
