

SECUPRO MERAK

THE PERFECT DEFINITION OF AN ALL-ROUNDER.

NEW

THE SAFER WAY TO CUT.

martor

SECUPRO MERAK

NO. 1240019

Original size

Ergonomic form

Whether with the right hand or the left hand: you will use the SECUPRO MERAK gladly and effectively. The safety knife is shaped with ergonomics in mind, and the force required to activate and release the lever is appropriately minimal, even at high cutting frequencies.

Safe blade change

You can change your blade without any additional tools, and without dismantling the SECUPRO MERAK. Instead, just press the blade change button and fold the blue lever out all the way to access the blade.

Light and stable

A particularly abrasion resistant plastic has been used for the SECUPRO MERAK. Nevertheless, it has a comfortable weight. Your cutting arm is protected from fatigue, and your safety knife from wear and tear.

Press for safety

You can prevent unintentional blade activity by activating the small blue blade lock. Simply press against the pictured lock to protect yourself from injury whenever your knife is stationary.

4-cutting edge blade

One blade, four sharp edges. You clearly get more out of your blade; four times more in fact. Rotating the blade allows you to cut with a constant cutting force, all the way through your work day.

Safety, comfort? Everything under (lockable) control! With ceramic blade.

The SECUPRO MERAK is our practical squeeze-grip safety knife with fully automatic blade retraction. With SECUPRO MARTEGO's "little brother" we have thought about one thing in particular: you. The lightweight and user friendly SECUPRO MERAK lets you work safely with little risk of cutting exhaustion, aided by the durable sharpness of the ceramic blade. And there's much more: thanks to a shallow cutting depth, your goods are also well protected.

	NO. 192	0.40 mm, stainless

Certificates and awards

Application

Safety technology

Fully automatic blade retraction – a very high degree of safety

The fully automatic blade retraction of the SECUPRO MERAK guarantees a very high degree of safety from cut injuries. The blade withdraws into the handle immediately after leaving the material being cut. Even when the lever is still being squeezed.

YOU CAN FEEL THE QUALITY.

SECUPRO MERAK
