

SECUPRO MARTEGO
ALMOST TOO GOOD TO BE TRUE!

NEW

THE SAFER WAY TO CUT.

martor

SECUPRO MARTEGO

NO. 1220019

Original size

Perfect handling

The advantages of the SECUPRO MARTEGO lie in your hands. The ergonomic squeeze-grip, the soft grip for better handling, the "pre-set" cutting edge; these three factors guarantee an ergonomic experience.

Change safely

When you need to change the blade, you can do so without any additional tools. Press the blade change button and fold the blue lever out all the way to access the blade.

Everything under control

It's all about aluminium. The powder-coated metal body doesn't only contribute to the SECUPRO MARTEGO's extraordinary design. It also increases robustness and enables the handle to withstand maximum stress.

Blade lock for extra protection

Your SECUPRO MARTEGO accompanies you on your job at every cut and turn? Glad to hear it. But always press the blue blade lock when you've finished cutting! This way the blade cannot make a surprise appearance.

4-cutting edge blade

The quality blade, with its four sharp edges, can be rotated multiple times. It's worth it! In the meantime, a relatively small cutting depth protects your goods from unnecessary damage.

For highest demands. With ceramic blade.

A cutting tool in which function and design go hand in hand? Meet the SECUPRO MARTEGO, our prize winning squeeze-grip safety knife with fully automatic blade retraction. Get used to the word "very" in its presence: it's very safe, very robust, very ergonomic, very versatile, and made to very high standards. It uses a MARTOR ceramic blade that is extremely sharp and long-lasting.

Application

Safety technology

Fully automatic blade retraction – a very high degree of safety

The fully automatic blade retraction of the SECUPRO MARTEGO guarantees a very high degree of safety from cut injuries. The blade withdraws into the handle immediately after leaving the material being cut. Even when the lever is still being squeezed.

PRODUCT FEATURES
