

SECUNORM HANDY MDP

TIMELESS APPEARANCE, PROBLEM-FREE APPLICATION.

THE SAFER WAY TO CUT.

martor

SECUNORM HANDY MDP
NO. 447

Original size

Can be metal detected

A cutting tool, or parts of it, can get lost while working. But only for a short while. Because the plastic that can be detected by a metal detector ensures you can find it again quickly.

No paint

You want to avoid risks wherever possible in your job? That's understandable. A handle without paint minimises the risk of contamination in the production process. No bits of paint can flake off and go where it shouldn't.

Slider on both sides

With the right hand? With the left hand? It's all the same. Because we have put a slider on to the SECUNORM HANDY MDP that is accessible from both sides. So anyone can work with it!

4-cutting edge blade

Why do you get more out of your stainless steel blade? Because it has four sharp cutting edges. By turning it and turning it over you quadruple the usage time, and cut like new again.

A classic, in pocket form. Metal detectable.

Don't be deceived by the compactness of this cutter. The SECUNORM HANDY MDP might be small, but it surely can cut. It's a cutting tool with „bite“ and all the qualities required for the job. The MDP version is your first choice if you're coming from either the food or medicine industry. All plastic parts are made from a metal detectable plastic. Coupled with a stainless steel blade, there are no risks with the SECUNORM HANDY MDP.

PRODUCT FEATURES

Technical features

	High safety		Metal detectable
	X-ray detectable		Tool-less blade change

Certificates and awards

Application

Safety technology

Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM HANDY MDP guarantees a very high degree of safety from cut injuries. As soon as you've started the cut remove your thumb from the slider. The blade will then withdraw back into the handle immediately after leaving the material being cut.

YOU CAN FEEL THE QUALITY.

SECUNORM HANDY MDP

- › Robust, stainless steel handle made of metal
- › Metal detectable plastic
- › One blade, four cutting corners
- › Automatic blade retraction
- › GS-certified for approved safety
