

SECUNORM 185

EFFICIENT TO CUT. COMFORTABLE TO USE.

NEW

THE SAFER WAY TO CUT.

martor

SECUNORM 185

NO. 18500410

Original size

Robust and practical

The SECUNORM 185's handle is made of stainless steel, designed for frequent cutting and long service. The knife has an ergonomic practical format and light-weight design to make cutting easier.

Optimal slider

The double-sided slider is suitable for both right and left handers. It has a large surface for perfect operation even when wearing gloves. Grooves on the slider improve slip resistance.

Safe blade change

Simply hold down the blade change button and pull out the slider from the front to give access to the magnet-fixed blade. The plastic insert and handle remain together so that nothing will be lost.

Practical eyelet

The SECUNORM 185 is equipped with an eyelet for attaching a strap, securing the knife to be on hand as soon as the next package needs opening.

4-cutting edge blade

The blade has four cutting edges that can be used one after the other. This makes economic and ecological sense and, with a fresh cutting edge, you can always cut like new.

Option ceramic blade

You can now also use a ceramic blade as an alternative to the installed steel blade. For the SECUNORM 185, this is the CERAMIC BLADE NO. 92C.

Application

Safety technology

Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM 185 guarantees a high degree of safety from cut injuries. As soon as you have started to cut, take your thumb off the slider. Then the blade will retract into the handle immediately after leaving the material being cut.

Lots of knife requiring little space.

Efficiency is important when opening cartons and pallets. Just what the nimble and robust SECUNORM 185 has been designed for. The compact safety knife impresses with features rarely found in this product group, such as a stainless steel handle, a large slider and easy blade change. Other benefits are the automatic blade retraction and a choice between steel and ceramic blades.

PRODUCT FEATURES

Technical features

	High safety		Safer blade change (with magnet)
	Abrasion resistant		Ergonomic
	4-cutting edge blade		Cutting depth
	Ceramic blade compatible		For right and left handers
