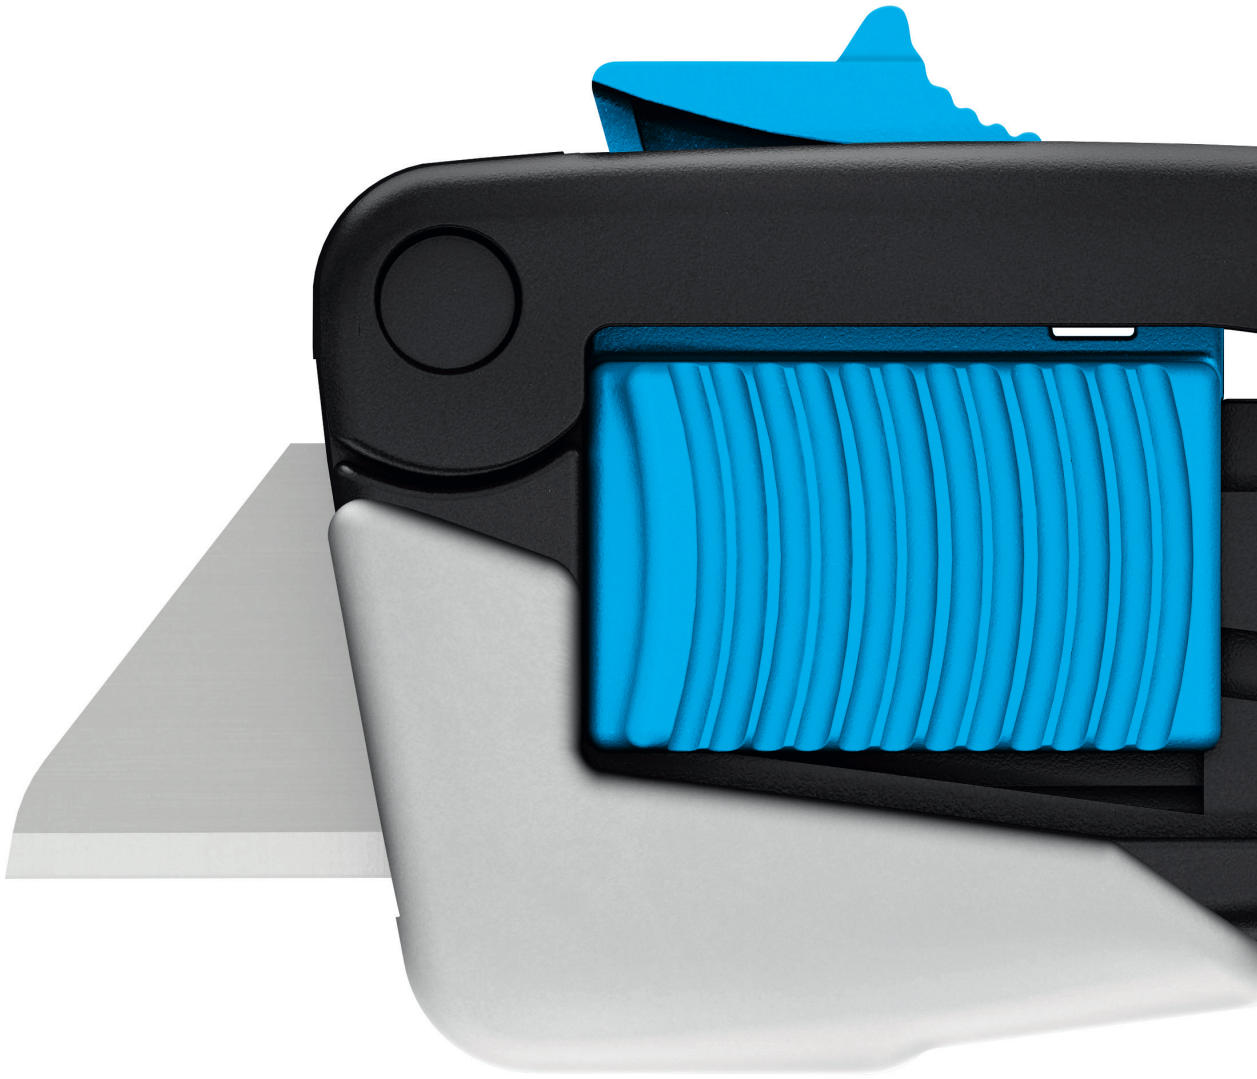
SECUPRO MAXISAFE

IMPORTANT NEW FEATURES. RELIABLY FAMILIAR.



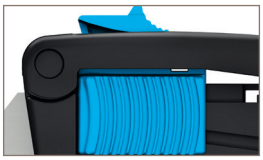
THE SAFER WAY TO CUT.

martor

SECUPRO MAXISAFE
NO. 10150610

Original size

Ergonomic handle
The plastic handle now sits even better in the hand thanks mainly to the new shape of the knife's back. The slider and blade change button have also been improved for efficient operation.



3-sided slider
From the right? From the left? From above? Regardless of how you want to activate the blade, all options are available with the SECUPRO MAXISAFE. What's more, the 3-sided slider is now grooved for better grip.

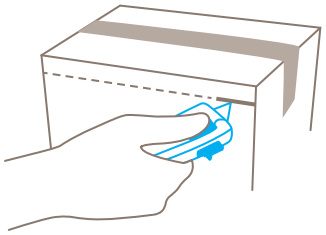
At the press of a button
Your two hands alone are enough to change the blade. And these short instructions: press the blade change button and swing open the handle. Push the blade carrier to the front and you can change the blade. It's that easy.

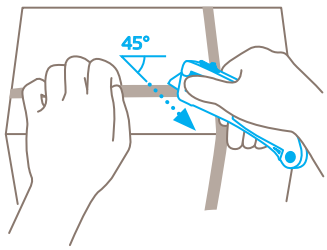
No abrasion
SECUPRO MAXISAFE is not afraid of a little friction. A metal abrasion protection cap, found on the underside of the knife head, works to prevent any general wear and tear as you cut your path through the day.

Double-edged blade
Don't change your blade the moment the tip turns blunt. Double the usage time of your blades and minimize wastage by always remembering to flip them over. Don't forget: there are two sides to every blade!

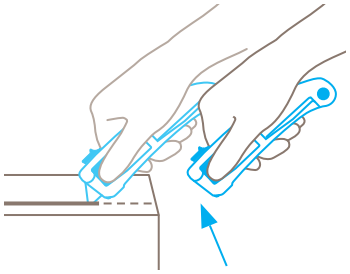
Perfect handling – from every side. With metal cap and a rounded-tip trapezoid blade.
The SECUPRO MAXISAFE has been making an impression for more than 15 years due to its lightness and wide range of applications. The safety knife has now reached new levels of ergonomic design. Just hold the 3-sided slider in your hand and try it out ... notice the difference? And it still has all the tried and tested features – such as fully automated blade retraction, a robust handle made from high-quality plastic or the additional metal cap.

Application





Safety technology



Fully automatic blade retraction – a very high degree of safety
The fully automatic blade retraction of the SECUPRO MAXISAFE guarantees a very high degree of safety from cut injuries. The blade withdraws into the handle the moment it leaves the material being cut. Even when the slider is being held forward.

PRODUCT FEATURES

Technical features

- Very high safety
- Tool-less blade change
- Very abrasion resistant
- Ergonomic
- 2-cutting edge blade
- Cutting depth
- Rounded-tip trapezoid blade
- Ceramic blade insertable
