SAFE BECAUSE
OF THE HANDLE

EVEN MORE FLEXIBILITY AT MARTOR. THE NEW OPTIONS IN THE BLADE RANGE.

At MARTOR you have always enjoyed the highest degree of freedom of choice. Between safety knives of different safety levels (SECUMAX – SECUPRO – SECUNORM). Between all-rounders and specialists. Between aluminum and plastic handles etc.

Now there is a new dimension: Ceramic blades – and thus the possibility to choose flexibly between steel and ceramic blades. Because both blades fit exactly in the same selected MARTOR handles. Their comfort and ergonomics let you work particularly efficiently, the built-in safety technology protects against cutting accidents. No matter which blade you use.

By the way: Thanks to its special product features, the new MARTOR ceramic blade extends the range of applications for your safety knife. And it remains permanently sharp, blade changes are rarely necessary. That also increases efficiency.

THE SAFER WAY TO CUT.

APPROVED SAFETY

At MARTOR, using the optional ceramic blades is covered by GS testing. The GS mark certifies that our products meet the requirements of § 21 ProdSG (German Product Safety Act).

VERSATILE CERAMIC BLADES – EXAMPLES

PLEASE NOTE

Attention: The blades are sharp. **Ceramic blade:** It may break under extreme pressure. Wear safety glasses. Replace damaged blade immediately. Observe the safety instructions for the knife.
